## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "in particular" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

In regard to claims 23-25, it is unclear if the "at least one element" is the same element as claimed in claim 18.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Young, Jr. et al. (US 5,667,122).

Young discloses a device for transporting film being driven by at least one electric motor, the improvement comprising means for mechanically engaging the film (12) by piercing at least

Art Unit: 3654

one surface of the film (12) with at least one element (22) so that the film (12) may be transported without slippage without the use of perforations.

In regard to claim 19, Young discloses the means for piercing the film (12) is at least one point (22) which pierces the film (12) to hold the film (12) while transporting the film.

In regard to claim 20, Young discloses the at least one point (22) is the point of a needle (22).

In regard to claim 21, Young discloses the at least one needle (22) is mounted on at least one unit (120).

In regard to claim 22, Young discloses the at least one unit (120) allows the at least one needle (22) to disengage the film (12) if the film jams.

In regard to claims 23-25, Young discloses at least one element (124) acts against the film (12) to hold the film (12) steady during and where the least one element (124) is a movable element (124), moving while the film (12) is being transported.

### ***Response to Arguments***

Applicant's arguments with respect to claims 18-26 have been considered but are moot in view of the new ground(s) of rejection. The cancellation of claims 1-17 and addition of claims 18-26 necessitated the new grounds of rejection. The substitute specification filed on 27 September 2007 is accepted.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
